

• QUALITY • EXPERIENCE • SUCCESS •

**QUALITY – EXPERIENCE – SUCCESS**

## **OUR MISSION IS BASED ON THE FOLLOWING 3 PILLARS**

**QUALITY:** use of top quality raw materials linked to stringent quality checks (GMP-certified).

Always focused on the well-being of pets and the satisfaction of their owners.

**EXPERIENCE:** a solid family enterprise which started its activities in 1936.

**SUCCESS:** besides our home market, our products are now available in over 55 countries.

## **COMPANY HISTORY**

After having been a successful Belgian producer of mixes and by-products for pigeons under the Natural Granen brand for over 75 years it was decided to extend the pigeon programme with mixes for birds. This is why a specific production unit was purchased in 1989. This plant is fitted out with the most up-to-date cleaning, mixing and packaging equipment. This has turned Natural Granen into one of the leading manufacturers in the field of bird feed. Besides private label we also market a range of own brand products under the name KING including bird food, food for small animals, dog and cat food.

Natural Granen has a worldwide reputation as specialized and reliable manufacturer and supplier of animal food.

## **OUR ASSETS**

- Use of high quality raw materials
- Stringent quality check of purchased raw materials
- Ideal storage conditions of raw materials
- Fast rotation of raw materials
- Appropriate ingredients per type of animal
- Professional staff
- Quality products obtained through modern cleaning, mixing and packaging equipment
- Internal quality control is guaranteed by our quality control management system
- GMP-certified

## KING CAGE & AVIARY

Keeping and breeding birds is a hobby which takes time and dedication. Suitable accommodation must be available before birds are purchased. Birds in perfect condition and health need beside accommodation the right nutrition. This is another determining factor to achieve success. The major part of the cage and aviary birds is seed eater. These seeds provide a great part of the necessary nutrients to maintain their metabolism.

Seeds contain, beside a certain percentage of moisture also dried stuff, composed by organic and anorganic elements:

- the anorganic part of the seeds contains minerals and trace-elements
- the organic part contains following constituents:
  - a. **Crude Proteins:** are of the utmost importance for the growth and development of the chicks (young birds) and assure the maintenance and renewal of the cells of adult birds. Proteins also play an important part during the moulting period, especially in the building of new feathers.
  - b. **Crude fats and carbohydrates:** are the main energy suppliers for the different processes of the bird's metabolism such as maintaining a normal body temperature and the correct functioning of the birds organs and muscles.
  - c. **Crude fibers:** a proper amount of cellulose (crude fibers) is necessary to promote normal movement of food through the bird's digestive tract. It also helps to provide the bulk which is necessary for normal droppings. As the crude fiber content in the diet increases, the amount of water consumed by the bird also will increase.

Beside these different organic parts, seeds also contain vitamins.

Most kinds of seeds are rich in the above elements but each element comes in a different proportion. As the needs of the birds differ in each season of the year (breeding period, weaning the chicks, the moulting period or the show season), a good knowledge concerning the nutritional values of the different seeds is very important.

The past 50 years the knowledge on nutrition has improved a lot thanks to scientific studies leading to new sowing and harvesting techniques combined with a better and controlled way of storing these grains and seeds .

In order to feed birds in the best possible way, you will understand that the manufacturing of mixtures for birds can only be done in a professional way.

King, a division of Natural Granen, has a complete range of double cleaned and optimal balanced mixtures for birds.

The breakdown of these optimal balanced mixtures is a combination of knowledge (scientist) and experience (successful bird breeders), worldwide.

King mixtures for birds, are high quality mixtures you can rely on.

## KING : QUALITY – EXPERIENCE - SUCCESS

### CANARY SEED MIXTURES “BASIC”

This basic King range includes 2 different mixtures composed of high quality seeds providing the essential requirements for canaries for a budget friendly price.

#### How to sprout or germinate seeds :

**Sprouting:** soak the seeds overnight, drain them, place them into a sprouting jar and rinse them several times a day until the seed sprout (they usually start sprouting after about 24 hours) - at which time they are ready to feed.

**Germinating:** soak a daily portion of seeds and grains in pure, clean water overnight. If you keep the seeds at room temperature, germinating starts after 12 hours. Germination is safer as the process is shorter and the seeds or grains don't have time to deteriorate in quality - and yet, germinated seeds also offer superior "living" nutrition similar to sprouts.

**Note:** only germinate one portion at a time. Feed germinated seeds with a germ no longer than 1 cm. When the germ is longer than 1 cm the taste of the germ becomes bitter and the birds will not eat it.

### SOAK AND GERMINATION MIX FOR BUDGIES/COCKATIELS AND PARROTS

art. 70002090

KING EGG FOOD

PROFESSIONALLY COMPOSED EGG FOOD FOR ALL TYPES  
OF SEED EATING AND ORNAMENTAL BIRDS

## KING EGG FOOD YELLOW

**King Egg food yellow** is a feed supplement for all types of seed eating and ornamental birds.

Because of its coarse structure King Egg Food is completely absorbed. King Egg Food contains vital nutrients for young and adult birds during the resting, breeding, and moulting season: (animal and vegetable) proteins, vitamins, amino acids, minerals and trace elements.

King Egg Food is composed of quality ingredients: egg, honey,... Thanks to the additional honey King Egg Food is ready for use.

**Instructions for use:** King Egg Food can be fed straight to the birds or can be completed with germinated seeds, vegetables and/or fruit.

- Resting period: feed 2 to 3 times weekly 1/4 of a daily ration of King Egg Food.
- Breeding season: feed birds with King Egg Food as much as they like.
- Moulting period: feed 1/4 of a daily ration of King Egg Food every day.

**Ingredients:** bakery products, egg and egg products, vegetable protein extracts, seeds, sugars, oils and fats, minerals.

# KING EGG FOOD

## KING EGG FOOD RED

**King Egg Food Red** is a feed supplement for red-colored canaries and all other seed-eating red factor ornamental birds. Because of its coarse structure King Egg Food is completely absorbed.

**King Egg Food Red** contains the necessary nutrients young and adult birds need during the resting-, breeding- and moulting season: (animal and vegetable) proteins, vitamins, amino acids, minerals and trace elements.

**King Egg Food Red** is composed of quality ingredients: egg, honey,... Thanks to the additional honey King Egg Food Red is ready for use.

**Instructions for use:** King Egg Food can be fed straight to the birds or can be completed with germinated seeds, vegetables and/or fruit.

- Resting period: feed 2 to 3 times weekly 1/4 of a daily ration of King Egg Food.
- Breeding season: feed birds with King Egg Food as much as they like.
- Moulting period: feed 1/4 of a daily ration of King Egg Food every day.

**Ingredients:** bakery products, egg and egg products, vegetable protein extracts, seeds, sugars, oils and fats, minerals.

10 KG

## KING EGG FOOD EUROPEAN FINCHES

**King Egg Food European Finches** is a feed supplement for all types of native birds. Because of its coarse structure this egg food is completely absorbed. It contains all the vital nutrients for young and adult birds during the resting, breeding, and moulting season: (animal and vegetable) proteins, vitamins, amino acids, minerals and trace elements. Especially to fulfill the needs of the native birds, this egg food is enriched with Gammarus.

Dehydrated Gammarus are very tiny little shrimp about the size of small meal worms. Softbills, insectivorous finches and waxbills love to eat these little shrimps. It is an optimal source of animal protein.

**King Egg Food** is composed of quality ingredients: egg, honey,... Thanks to the additional honey King Egg Food is ready for use.

**Instructions for use:** King Egg Food can be fed straight to the birds or can be completed with germinated seeds, vegetables and/or fruit.

- Resting period: feed 2 to 3 times weekly 1/4 of a daily ration of King Egg Food.
- Breeding season: feed birds with King Egg Food as much as they like.
- Moulting period: feed 1/4 of a daily ration of King Egg Food every day.

**Ingredients:** bakery products, egg and egg products, vegetable protein extracts, seeds, sugars, oils and fats, minerals.

10 KG

## KING UNIVERSAL SOFTBILL

**King Universal Softbill food** is a complete feed for all species of fruit- and insect-eating birds. Containing all the essential nutrients both young and adult birds need during the resting-, breeding and moulting season: (animal and vegetable) proteins, vitamins, amino acids, minerals and trace elements.

**King Universal Softbill food** is composed of quality raw materials.

By adding honey King Universal Softbill food is very well assimilated, even for recently imported birds. This product also contains additional insects and berries.

**Instructions for use:** feed the birds a daily portion of King Universal Softbill food. Fruit eating birds can also be given some fresh fruit in a separate bowl.

**Ingredients:** bakery products, egg and egg products, vegetable protein extracts, seeds, sugars, oils and fats, minerals

250 ml & 500 ml

250 ml

### KING FLORA –DIGEST PLUS

**King Flora-Digest Plus** is a concentrated extract from 15 different and special selected herbs and vegetables.

**King Flora-Digest Plus** also contains an Echinacea extract which supports an optimal condition and resistance of the bird's organism.

Due to the beneficial effects of the ingredients, its unique cooking procedure and the addition of an acetic acid, **King Flora-Digest Plus** is strongly recommended during a period of medical treatment. Furthermore it supports the bird's digestion, it keeps the pH factor in the bird's crop stable and has an active role in achieving silky soft feathers during the moulting period of the birds.

### KING MULTI-KOMPLEX PLUS

**King Multi-Komplex Plus** is a high quality, concentrated liquid multi-vitamin complex, with stabilized\* vitamins, based on scientific knowledge and tested by successful bird breeders, worldwide. **King Multi-Komplex Plus** assures due to the specific composition of different vitamins, that the bird's organism gets all the necessary vitamins in an optimal balanced way.

**King Multi-Komplex Plus** is 100 % water soluble, has a nice taste and guarantees a good intake and absorption of the birds. A regular use of Multi-Komplex Plus prevents avitaminosis and increase the chances of excellent breeding results.

\* = stabilized vitamins will not lose as fast their nutritional values as non-stabilized vitamins.

**King Multi-Komplex Plus** is manufactured by "DSM" a manufacturer of nutritional ingredients for use in pet food products and supplements including minerals, vitamins, carotenoids, nutraceuticals and long chain polyunsaturated fatty acids.

### KING AMINO-CAL PLUS

**King Amino-Cal Plus** is a tonic consisting of minerals, trace-elements and a specific chain of amino-acids. Recommended to use in stages of difficult conditions and stress, such as breeding, moulting and exhibition period. **King Amino-Cal Plus** brings birds back in an excellent condition or maintains it.

**King Amino-Cal Plus** is water soluble and assures a fast absorption in the bird's organism. This results in a much faster positive effect than with similar products in powder form.

Using **King Amino-Cal Plus** on a regular base, avoids possible calcium deficiency, improves the breeding results, guarantees healthy chicks and brings or keeps the birds in an optimal condition during the exhibition and moulting season.

## KING HAND REARING FOOD

### Product Presentation

KING HAND REARING FOOD is the ideal breeding food for all types of young birds.

It is particularly suitable for additional feeding of youngsters still in their nest.

### How to use?

Hand feed **must** always be prepared using lukewarm water (37°C)! In the beginning the thin mash must be injected. As the youngsters grow older prepare a thicker mash (see table). See to it that between two feedings, the bird's gizzard is always empty.

**Caution:** The mash must be freshly prepared before every meal. It is preferable to prepare the feed portions in small quantities.

### COMPOSITION

Cereals
egg and egg products
bakery products
vegetable protein extracts
sugars
milk and milk products
minerals

### ANALYSIS

	%
Raw proteins	15,70%
Raw fat	3,00%

Phosphorus (P)	0,40%

### NUTRITIONAL ADDITIVES/KG

12.000 I.U.	Vitamin A
1.200 I.U.	Vitamin D3
30 mg	Vitamin E
1 mg	Vitamin K
1 mg	Vitamin K
6 mg	Vitamin B1
21 mg	Vitamin B2
28 mg	Vitamin B5 (Pantothenic acid)
70 mg	Choline Chloride
1 mg	Vitamin B6
0,05 mg	Vitamin B12
0,2 mg	Vitamin H (Biotine)
4 mg	Folic acid
3 mg	Vitamin C
50 mg	Magnesiumoxide, magnesium
25 mg	Manganese(II)sulphate (monohydrate), manganese
17 mg	Zinc sulphate (monohydrate), zinc
2 mg	Copper(II)sulphate (pentahydrate), copper
1 mg	Calcium iodate (anhydrous), iodine
150 mg	DL-Methionine
780 mg	L-Lysine

AGE	KING HAND REARING FOOD	WATER
0 to 2 days	1 part	6 parts
day 2 – day 3	1 part	5 parts
day 3 – day 4	1 part	4 parts
day 4 – day 5	1 part	3 parts
Day 5 – weaning	1 part	2 parts

Packing : 240 g

## KING BIRD GRIT

**KING BIRD GRIT** is a mixture of sea shells, oyster shells, redstone and charcoal. The purified charcoal promotes good digestion and absorbs any undesirable substances present in the gut. **KING BIRD GRIT** avoids possible mineral deficiency. It contains no artificial colorants or flavorings... in short this is a top quality product.

### How to use ?

1 Soup spoon per 2 to 4 birds. Be not wondered if the grit stays temporarily untouched as birds eat only a low quantity of bird grit.

### Breakdown :

Sea shells, oyster shells, redstone and charcoal.

**Packing:** 25 kg

## FLOOR COVERING

## KING BIRD SAND

**KING BIRD SAND** is a mixture of white sand and fine mixed oyster- and seashells. It is a 100 % natural product and has been disinfected before getting heated above 100° Celsius.

**KING BIRD SAND** is the ideal floor covering for cages and aviaries.

**KING BIRD SAND** guarantees a correct hygiene, very important to keep the birds in a good health.
